

Privacy statement Travelling with a contactless Debit or Credit Card with Transdev and Connexxion

(September 1, 2023)

The nine Dutch public transport operators¹ (“Transport Operators”) and Translink are together introducing a new option for travelling by public transport, namely purchasing a Ticket by checking in and out with your Debit or Credit Card. We are doing this in collaboration with a number of payment services². With these payment services, your Debit or Credit Card is linked to a public transport function in the Netherlands. You pay for your journeys via the Bank Account associated with your Debit Card, or via the spending limit on your Credit Card. For Transdev, this possibility only applies to buses in the following concessions (hereafter: Soft Launch):

- Gooi en Vechtstreek;
- Zaanstreek;
- North-Holland North;
- Amstelland-Meerlanden;
- Haarlem-IJmond;
- Zuidoost-Brabant;
- Zeeland;
- Hoeksche Waard – Goeree-Overflakkee;
- Veluwe Zuid;
- Parkshuttle Rivium;
- Trainservice Amersfoort – Ede-Wageningen;
- Stadsregio Arnhem-Nijmegen;
- IJsselmond.

If you are travelling by checking in and out using your Debit or Credit Card, you and Transdev are entering into a transport agreement to which the General Terms and Conditions of Urban and Regional Transport and the ‘OVpay Check-in/out Conditions Using your Debit Card and Credit Card’ apply. The Processing of your Personal Data is necessary in order to execute this transport agreement. You can then travel and pay with your Debit or Credit Card on public transport operated by Transdev. Transdev and Translink can also provide you with services.

Do you not want Transdev and Translink to have access to the necessary Personal Data? Then you will not be able to travel and pay with your Debit or Credit Card, and will have to use another regular (Transport) Ticket.

Do you want to know more about the use of your Personal Data when travelling with a Debit or Credit Card in Transdev buses within the scope of the Soft Launch? Then read on.

¹ Arriva, Connexxion, EBS, GVB, HTM, Keolis, NS, Qbuzz, and RET. See ovpay.nl for the latest overview.

² Maestro, Mastercard, VPAY, and VISA. See ovpay.nl for the latest overview.

Overview

In part 1 of this privacy statement, we explain the definitions that are used in this privacy statement.

Part 2 describes how travelling with a Debit or Credit Card works, and what Personal Data we will use and for which purposes. This concerns Personal Data that is needed for the contactless payment of your journey, cross service, and for when you contact Transdev customer care or OVpay customer care.

In Part 3, we describe your rights under the applicable data protection and privacy laws, and provide more information on how we deal with your Personal Data. You will also find our contact details here, should you have any questions regarding this privacy statement.

Part 1 - Terms

In this privacy statement, terms with a capital letter are used that are explained in the text of the privacy statement. For your convenience, these terms and their meanings are listed in this chapter.

General Terms and Conditions: OVpay Check-in/out Conditions Using your Debit Card and Credit Card.

General Terms and Conditions of Urban and Regional Transport: General Terms and Conditions for the use of public urban and regional transport by bus, tram, light rail, metro, and regional transport by train.

***** App³:** *a mobile application developed and offered by Transdev on its own or by Public Transport Operators and Translink jointly (OVpay) that allows passengers with a Debit Card or Credit Card to create, consult their online account, link the Debit Card and/or Credit Card to it, and thus, for example, to easily view their travel transactions and payments and submit service requests, such as rectifying a missed check-out. Use of an App is subject to the terms and conditions of use of the relevant App. ****

ASI / AVR (“Account Status Inquiry / Account Verification Request”): depending on the payment schedule of the Debit or Credit Card, a status check will be performed on the Debit or Credit Card. For Debit or Credit Cards under the Mastercard payment schedule, this is called an ASI. For Debit or Credit Cards under the VISA payment schedule, this is called an AVR. This status check will verify whether there is a payment account for the Debit Card or a spending limit for the Credit Card, and whether the Debit or Credit Card is active and has not been reported as stolen for instance.

Bank: a (European) financial institution that provides Maestro, Mastercard, VPAY and/or VISA payment services and maintains the Bank Account to which the Debit Card used by the passenger on public transport is linked.

Debit Card: a contactless card issued by the Bank for payment (physical or virtual on a smart device) that the passenger uses for public transport by checking in and out.

Credit Card: a contactless Visa credit card or Mastercard issued by the Credit Card Company with which the passenger uses public transport.

Credit Card Company: a (European) financial institution offering Maestro, Mastercard, VPAY and/or VISA payment services and which has issued the Credit Card to the passenger who is using it to pay for journeys on public transport with Transdev.

Generic Back Office (GBO): Translink’s digital back office where, among other things, Transport Tickets are registered, Fare Prices are calculated, and the Daily Total is recorded.

Joint Controller: If two or more Controllers jointly determine the purposes and means of the Processing, they are Joint Controllers as defined in the GDPR.

Primary Account Number (“PAN”): a unique Debit or Credit Card identification number or simply the 16-digit card number. With a Credit Card, this number can be seen on the front of the Credit Card. With a Debit Card, this number is on the chip of the Debit Card and is almost always invisible.

³ The App is expected to be available in 2022 (in some form).

PAN serial number: serial number of the Debit or Credit Card, which is on the chip of the Debit or Credit Card and is not visible. The PAN serial number is not the same as the card serial number. The card serial number is however visible on the front of the Debit or Credit Card.

Payment Card Industry Data Security Standard (“PCI - DSS”): an information security standard for organisations handling Debit Cards or Credit Cards of the main card schemes (Mastercard/ VISA).

Personal data: any information regarding an identified or identifiable natural person.

Pseudonymisation: the Processing of Personal Data in such a way that the Personal Data cannot be linked to a traveller without the use of additional data, provided that this additional data is stored separately, and technical and organisational measures have been taken to ensure that the Personal Data is not linked to an identified or identifiable traveller as defined in the GDPR.

Travel Day: the period which starts at 00.00 hours and ends the next day at 03.05 hours.

Service Reference ID: this is a code comprising a combination of fourteen letters and numbers, created uniquely for each payment. This code is linked to the amount that is debited from your Bank Account or spending limit.

Technical Debit Card or Credit Card Data: this technical data consists of the numbers of the Debit Card or Credit Card, i.e. the Primary Account Number, the PAN serial number, and the validity date of the Debit Card or Credit Card.

Transdev: Connexion Openbaar Vervoer N.V., with registered office in Haarlem and principle place of business in Hilversum, trading under the name “Transdev Nederland Openbaar Vervoer”, hereinafter referred to as: “Transdev”, and its affiliates or subsidiaries.

Translink: Trans Link Systems B.V., having its registered office and principal place of business in Amersfoort.

(Transport) Ticket: the ticket that provides valid access to the bus and that has been purchased by the passenger by checking in for each journey with Transdev with the Debit Card or Credit Card used to travel, and that consists of a digital registration in the Generic Back Office. A (Transport) Ticket is only valid if it meets all the requirements set out in the General Terms and Conditions for Urban and Regional Transport.

Transport Operator(s): the Dutch public transport operators listed on the OVpay.nl website.

Processing: an operation or set of operations relating to Personal Data or a set of Personal Data, whether carried out by automated processes or not.

Processor: a natural or legal person, a government agency, a service or another body that processes Personal Data on behalf of the Controller.

Controller: a natural or legal person, a government agency, a service or another body that, alone or together with others, determines the purpose of and means for Processing Personal Data.

Website: the own websites of Transdev and Connexion, or the website www.ovpay.nl, which is managed by Translink on behalf of all Transport Operators, on which the passenger can find information on journeys and payment by Debit and Credit Card.

Part 2 - How does travelling and paying with a Debit Card or Credit Card work?

A. Travel

When checking in with your Debit or Credit Card, the card reader will read the technical data from your Debit or Credit Card. Here we check whether the Debit or Credit Card can be used to travel, and will inform you accordingly via the card reader. Holding your Debit or Credit Card to a card reader is called a “tap”.

If you are able to travel using a Debit or Credit Card, Personal Data will be sent to the GBO of Translink when you check in and out using the card readers of the Transport Operator with which you are travelling. In addition to the technical details of your Debit or Credit Card, this includes the date, time and stop or station where you boarded or alighted. Your journey is compiled and your fare is calculated using this information as well as, if applicable, additional information on products and profiles granting you a discount.

First time travelling with your Debit or Credit Card

The first time you check in with your Debit or Credit Card, an automatic check is made to determine whether that Debit or Credit Card is linked to a public transport service in the Netherlands. This also occurs if in the past 14 days you have not used the Debit or Credit Card in question for travel, and subsequently check in again.

The GBO will also check with the Bank or Credit Card Company that holds your Debit or Credit Card if the card has been blocked. If this is the case, the public transport travel function of the Debit or Credit Card will then be blocked (temporarily), and you will not be able to use it for travel. This is a decision of the Bank or Credit Card Company. The Public transport operators and Translink cannot change this.

Travelling with your Debit or Credit Card

Each time you check in with your Debit or Credit Card, an automatic check will be performed against a deny list at Translink to ensure that the Debit or Credit Card has not been blocked (temporarily). The list is managed in the GBO and distributed to Transport Operators. A Debit or Credit Card will be added to this list by Translink if:

- it appears that the Debit or Credit Card that you are using on public transport is on an alert list of the Bank or Credit Card Company, e.g. because it is listed as stolen or missing;
- settlement for the Debit or Credit Card has not taken place for the use of public transport, e.g. because the balance or spending limit on your Bank Account or Credit Card was insufficient at the time of settlement;
- A product or profiles granting you a discount is used while not respecting the applicable conditions.

B. Payment

Based on checking in and out with the Debit or Credit Card, the GBO will calculate the fare for the journeys you make. During the night following the Travel Day on which you travelled, the amount due for all the journeys you made in one Travel Day is presented in one sum to the Bank or Credit Card Company.

To process the payment, Translink provides the Technical Debit or Credit Card details and the Service Reference ID to the Bank or Credit Card Company.

Upon successful payment, you will see the amount debited on your (digital) account statement, and will receive your unique Service Reference ID for each day you travelled. A Service Reference ID is preceded

by the letters 'NLOV'. You can find your digital account statement by logging into your secure Banking environment.

In deviation from the above, the amount due for the journeys made will be debited during the Travel Day, instead of during the night following the Travel Day, if the amount exceeds a predetermined limit as set by the Transport Operators. The amount due for all journeys will then directly be debited against your balance or spending limit. Following a successful payment, any other journeys you make will be presented to the Bank or Credit Card Company during the night following your Travel Day, unless the predetermined limit has been reached again.

Summary reports

Translink records all check-ins and check-outs in the GBO and creates the journey reconstruction and the determination of the fare. Translink, together with the financial institution EMS and your Bank or Credit Card Company, handles the payment for the journeys you have made with your Debit or Credit Card. Translink also ensures that Transdev and the other Transport Operators receive all payments daily for the journeys made.

All Transport Operators receive daily summary reports from Translink in order to check the accuracy of their own transactions and payments. These are reports on transactions (such as check-in, check-out or failed tap), journeys (combining a check-in with a check-out) and payments relating to the specific Transport Operator.

Unsuccessful payment

If payment is unsuccessful, for example because the balance or spending limit is too low, we will temporarily block the travel function associated with the Debit or Credit Card. You can then no longer travel with your Debit or Credit Card until the outstanding amount has been paid.

The GBO may issue repeated payment requests to debit the amount due from your account or spending limit within a period of 62 calendar days. The (temporary) block will be lifted if the payment is successful.

Both during and after this period, you as a passenger can also pay the outstanding amount yourself. To do so, you have to present your Debit or Credit Card at a card reader. A payment request will be made to your Bank or Credit Card Company via the GBO. If the payment is successful, you will again be able to travel with your Debit or Credit Card approximately 15 minutes later.

(Temporary) block on travel use

The (temporary) block on using a Debit or Credit Card to travel can be checked by holding your Debit or Credit Card to a card reader of a Transport Operator and by reading the notification on the display or by contacting OVpay customer care.

While the travel use of the Debit or Credit Card is blocked, you can of course still use another regular (Transport) Ticket for travelling by public transport.

C. Service

With a Service Reference ID, you can make use of the service option for "checking in or out with your Debit or Credit Card".

App⁴ and website

Within both the Transdev App and the OVpay App, you can link your Debit or Credit Card to the App. First you will create an account with your own password. Based on a Reference number and corresponding amount, you can then use the Transdev App to view your Transdev travel history for the past 18 months. Via your online account it is amongst others possible to check if you did check in and/ or check-out, to view the fare for travels you made and to also view your payments, payments status and any contingent blocking of your Debit or Credit Card.

Among the items you can view in the OVpay app is the complete travel history of journeys you have made in the past 18 months using your Debit or Credit Card for all public transport services. In your account of a Transport Operator (web or App) you can only view the journeys you made with that Transport Operator using your Debit or Credit Card, also for the past 18 months. In the OVpay app, you can also set to receive notifications when checking in and checking out.

On the ovpay.nl website, with a Reference number and corresponding amount, you can only view the journeys relating to this specific payment

Customer care

Questions about travelling with a Debit or Credit Card can be put to Transdev customer care or to OVpay customer care. Customer-care employees cannot view your Debit or Credit Card details, or the details of your payment account.

A customer-care representative will always specifically ask for your details if this is necessary in order to answer your questions. The customer-care staff may ask for your Reference number and the corresponding debit amount, depending on the questions you ask.

Cross Service

The Transport Operators and Translink have signed mutual agreements so that Transdev can also help you with questions about a journey with other Transport Operators. It has been agreed that you may contact the Customer Care services of any Transport Operator with questions concerning all the journeys and transactions you have made during the past 62 days. Questions about a missed check-in or check-out can be put to OVpay customer care. The customer-care staff may ask for your Reference number and the corresponding debit amount, depending on the questions you ask.

D. Inspection

Anyone using public transport must have a valid (Transport) Ticket. If you check in with your contactless Debit or Credit Card, your (Transport) Ticket has been linked to your Debit or Credit Card via a registration in the GBO. Special ticket inspectors ('BOA' in Dutch) conduct regular checks in the vehicles and at stops and stations to ensure that passengers have a valid (Transport) Ticket. If a ticket inspector wishes to check your (Transport) Ticket, you must present your Debit or Credit Card to the inspector's inspection device. The technical data of your Debit or Credit Card will be read and used in accordance with the PCI DSS information security standard.

To enable the inspector to also show you leniency and/or provide a service, the inspector will ask your specific permission to do this. The inspector can then view the last ten actions involving the use of your Debit or Credit Card for public transport on their device (up to a maximum of 62 days ago). This data is

⁴ The App is expected to be available in 2022 (in some form).

displayed on the device for a maximum of five minutes, but will disappear earlier if another Debit or Credit Card is held against the inspection device or if the inspection app is closed.

Part 3 - Privacy rights and more information

A. Identity of the Controller

Your Personal Data is Processed by:

- Connexxion Openbaar Vervoer N.V., trading under the name “Transdev Nederland Openbaar Vervoer”, a public limited company incorporated under Dutch law, with registered office in Haarlem and principal place of business in Hilversum at (1211 EX) Stationsplein 13, registered at the Dutch Chamber of Commerce under number 32083680 (“Transdev”), and;
- Trans Link Systems B.V., a public limited company incorporated under Dutch law, with registered office and principal place of business in Amersfoort at (3818 LE) Stationsplein 151, registered at the Dutch Chamber of Commerce under number 30177126 (“Translink”).

Transdev, the other Transport Operators and Translink are Joint Controllers for processing Personal Data relating to travel using your contactless Debit or Credit Card, for the following processes and the associated Personal Data:

Process	Purpose	Personal data	Retention period
Tapping <i>Lawful basis: performance of contract</i>	Status check Debit Card and validation of tap	Technical Debit Card data (PAN, PAN serial number and validity date); Tap data.	Maximum 24 hours
Processing taps (transaction processing) <i>Lawful basis: performance of contract</i>	- Processing of taps - Qualifying of taps: tap-in/ tap-out/ tap-driven debt recovery - Compiling journeys based on check-in/check-out (travel transaction data); determining the fare price; preparing travel transaction data/tap-driven debt recovery for payment. - Parting trips and creating synthetic split-trips per Public transport operator to be able to allocate split-trips to the correct Public transport operator and to determine the fare	Technical Debit Card data (PAN, PAN serial number and validity date); Pseudonymised-display tokens derived from technical Debit Card; Travel transaction data.	18 months
Central passenger support (self-service) – without service account <i>Lawful basis: performance of contract</i>	- Giving passengers insight into travel and payment transactions and outstanding debt via OVpay website - Facilitating missed check-out via website or OVpay Customer Care.	Reference number; Payment transaction data; Outstanding debt; Travel transaction data (such as check-in/check-out; date/time; location; vehicle; journeys and prices per journey).	Until service is provided. No data is left behind on the OVpay website.
Central traveller support (self-service) – with service account	Giving data subjects insight into travel and payment transactions and outstanding debt via OVpay app.	User name and password (2FA) ; Reference number; Payment transaction data; Outstanding debt;	Until service is provided. No data is left behind in the OVpay app.

Process	Purpose	Personal data	Retention period
<p><i>Lawful basis: performance of contract</i></p>	Facilitate process of missed check-out via OVpay app.	Travel transaction data.	
<p>Central passenger support (self-service) – with service account at Transport Operator</p> <p><i>Lawful basis: performance of contract</i></p>	<p>Giving data subjects insight via Transport Operator’s website/app into:</p> <p>i) travel and payment transactions and outstanding debt at the Transport Operator in question (transactions in the past 18 months);</p> <p>ii) outstanding debt and the underlying transactions (if any) with other Transport Operator.</p>	<p>Reference number;</p> <p>Payment transaction data;</p> <p>Outstanding debt;</p> <p>Travel transaction data.</p>	Until service is provided. No data is left behind on the website and in the app of the Transport Operator.
<p>Decentralised passenger support service via customer care – Cross Service</p> <p><i>Lawful basis: legitimate interests of Transport Operators and Translink</i></p>	<p>Via Customer Care (counter or telephone) of Transport Operator (Cross Service) to inform data subjects about:</p> <p>i) outstanding debt;</p> <p>ii) travel and payment transactions at the Transport Operator in question (past 18 months)</p> <p>iii) travel and payment transactions at other Transport Operators (Cross Service) in the past 62 days.</p>	<p>Reference number;</p> <p>Payment transaction data;</p> <p>Outstanding debt;</p> <p>Travel transaction data.</p>	Until service is provided. 	public transport using the same Debit Card.		

B. Contact details

For any questions, requests or complaints regarding travelling with a Debit or Credit Card in the Soft Launch, you may contact:

Transdev Customer Care:

Telephone number: 0900-8686

Can be reached by phone Monday to Saturday from 7 a.m. to 8 p.m.

Contact form at www.transdev.nl/klantenservice/contact

Transdev Service counter at Stationsplein 13 in Hilversum (open Monday to Saturday from 7 a.m. to 7 p.m.)⁵

Connexxion customer care:

Telephone number: 0900-2666399

Can be reached by phone Monday to Saturday from 8 a.m. to 7 p.m.

Contact form at www.connexxion.nl/klantenservice/contact

For any questions on travelling with a Debit or Credit Card in general, you may contact:

OVpay customer care:

Telephone number: 0900-1433

Contact form at www.ovpay.nl/contact

Can be reached Monday to Saturday from 9 a.m. to 5 p.m.

If you want more information on how Transdev or Translink handles your Personal Data, you may contact the data protection officer of either organisation:

Transdev:

privacy@transdev.nl

Translink:

fg@translink.nl

C. The Lawful Bases for Processing

When you check in and out with your Debit or Credit Card at Transdev, the lawful basis for the Processing of Personal Data is the performance of a contract. The contract in question is the transport agreement to which the General Terms and Conditions of Urban and Regional Transport and the 'OVpay Check-in/out Conditions Using your Debit Card and Credit Card' apply.

The legitimate interests of the Transport Operators and Translink form the lawful basis for providing a cross service. Transport Operators and Translink want to answer your questions as efficiently as possible through a single desk rather than several. It is in your interest as well as that of the Transport Operators and Translink that we are able to deal as efficiently as possible with your questions at various Transport

⁵Opening hours may change during holiday periods and on bank holidays.

Operators. Our customer-care agents are only able to view data that is necessary to answer your questions.

Depending on the question and your request, the inspector can scan the Debit or Credit Card to provide information on the last (maximum) ten travel transactions that you have made (on Public Transport). In order to offer you this service, it is necessary to Process your Personal Data. Here, the lawful basis for the Processing of your Personal Data is consent.

Managing notifications for checking in and checking out in the OVpay app is based on your consent.

D. With whom do we share your Personal Data?

Transdev, the other Transport Operators and Translink make use of the services of Processors. We always sign written agreements with our Processors. We do this by entering into a so-called 'processor's agreement', in which among other things we stipulate agreements about the security of your Personal Data and about the use of your Personal Data.

Translink engages the services of EMS (www.emspay.nl) to handle payments with your Bank or Credit Card Company. Translink shares the Technical Debit or Credit Card data and the Reference number with EMS. EMS Processes this data in its capacity as Controller.

In certain cases, Transport Operators and Translink have a statutory and regulatory obligation to share your data with third parties, for example in the case of criminal proceedings in a court.

E. How long will your Personal Data be retained?

We need your Personal Data to enable check-in and check-out with your Debit or Credit Card, allow inspection of your Debit or Credit Card, and to be of use to you, which includes providing you with service. This also determines the retention period of your Personal Data. We do not keep your Personal Data for longer than is necessary, and not for more than 18 months. After that, we delete your Personal Data. Banks and Credit-Card Companies have their own retention periods, based on legislation and regulations that apply to them.

F. What are your rights as data subject?

In principle, you have the following rights:

- The right to know if and what Personal Data of yours is being Processed.
- The right to access this Personal Data (insofar as this does not violate someone else's privacy).
- The right to have your Personal Data transmitted.
- The right to have your Personal Data rectified, completed, or removed if necessary.
- The right to have your Personal Data (partially) erased. A request for erasure can only be granted if the retention of your Personal Data is not of significant interest to us or another party, and if there is no statutory regulation that stipulates that the data must be retained.
- The right in certain cases to oppose the Processing of your Personal Data.
- The right in certain cases to object to the Processing of your Personal Data.

If you wish to exercise your privacy rights, you can indicate this by contacting the Transdev or Translink Customer Care, or by contacting the Data Protection Officer of Transdev or Translink; see the contact details above (part 3 - B). It is also important for you to note that, in accordance with the information security standard PCI - DSS, the Technical Debit or Credit Card details that Transdev and Translink receive from you will be encrypted in the inspection device and in the systems of Transdev and Translink. This means

that Transdev and Translink cannot trace this data back to you personally. Without obtaining additional information from you (the Service Reference ID and the amount that goes with it), it is impossible to make a connection between you and, for instance, your journey list. This ensures maximum protection of your privacy, but also means that it may not be possible for Transdev and Translink in certain cases to satisfy your privacy rights mentioned above.

G. Complaints regarding the Processing of Personal Data

You may send complaints about the Processing of your Personal Data to Transdev or Translink. See the contact detail above (Part 3 - B). You also have the right to lodge a complaint with the supervisory authority, the Dutch Data Protection Authority (Autoriteit Persoonsgegevens). For contact details, see the website of the Dutch Data Protection Authority: www.autoriteitpersoonsgegevens.nl.

H. Obligation to provide data, and what happens when you do not provide data

We can only perform the agreement if we are allowed to use the required Personal Data. Do you not want Transdev and Translink to have access to the necessary Personal Data? You can then also not travel and pay with your Debit or Credit Card.

I. Automated decisions

Automated decisions are made in two cases; if a fare is still payable, and if the Debit or Credit Card has been blocked by a Bank or Credit Card Company.

A fare that is still payable

As a passenger, you always have to pay the fare that is due. If your Bank or Credit Card Company is unable to process your payment, the travel function of the Debit or Credit Card will automatically be blocked (temporarily). You can then still check out for a journey, but you cannot check in (again) for a journey.

If the travel function of the Debit or Credit Card is blocked due to insufficient balance or spending limit, you cannot check in again with this Debit or Credit Card until your debt has been settled. Repeated attempts will be made to debit your account or spending limit within a period of 62 calendar days. You can also offer your Debit or Credit Card to a card reader of a Transport Operator. Your check-in will be refused (you will see an error on the display), but another attempt will be made to debit your account or spending limit. If the payment succeeds, you will be able to check in and travel again approximately 15 minutes later.

You may object to this automated decision whereby your Debit or Credit Card is blocked (temporarily). This can be done via OVpay customer care. The customer care agent will examine why the Debit or Credit Card was blocked, and will unblock the card if warranted.

Debit or Credit Card blocked by a Bank or Credit Card Company

If a Debit or Credit Card, which has been used in public transport, has been reported stolen or missing by a Bank or Credit Card Company, or if there is another reason why the card has been blocked (temporarily) by the Bank or Credit Card Company, the travel function of the Debit or Credit Card will also automatically be blocked (temporarily).

This is also part of the General Terms and Conditions for using your Debit or Credit Card that you have agreed with your Bank or Credit Card Company.

The Transport Operators and Translink cannot change this (temporary) block. If you have any questions in this regard, please contact your Bank or Credit Card Company.

J. Security of Personal Data

Transdev, the other Transport Operators and Translink will secure your Personal Data, for example against unauthorised access, loss and theft. We do our utmost to secure your Personal Data against unauthorised access, loss or theft. Transdev, the other Transport Operators and Translink all have policies in place for making public transport payments using the Debit or Credit Card in such a way that an appropriate level of security is applied by default.

Transport Operators and Translink apply PCI DSS for the security of Debit or Credit Card details. This is an international information security standard drawn up by Banks and Credit Card companies. This standard seeks to protect payment card details and prevent misuse of card information and, by extension, damage.

Your Technical Debit or Credit Card details will only be Processed in card readers at Transdev and in the Translink GBO in Pseudonymised form.

K. Use of cookies

The following websites use temporary or session cookies: www.ovpay.nl, www.connexxion.nl and www.transdev.nl. These cookies will not be used to compile visitor profiles or to track your browsing and search behaviour.
